

WHO WE ARE

Progeny Restoration Corp was founded in 2003 by Abdul Wahab and his son, Iqbal Hussain. The leadership has over 40 years experience in the construction industry. The family team knew that if they could combine each of their experiences and skills in engineering, construction, and management and add a unique working culture, something truly special and beneficial for New York communities could be created. The result was Progeny Restoration, a general construction company with the mission to help beautify the city structurally.

OUR UNIQUE CULTURE

Progeny Restoration specializes in general contracting work for residential and commercial spaces, and in landmark restoration. Throughout our projects, we have a special focus on our relationships with our customers. Becoming worthy of customer trust is a key ingredient to our approach. We work to achieve the customer's needs and are extremely tailored and scalable to the project. For every customer's requests, we at Progeny Restoration will work for YOU.

“What made me happiest is that while past contractors never fulfilled their agreements, Progeny Restoration was so responsible. They returned every day, were efficient and polite.”
-P. WALKER, BROWNSTONE OWNER

OUR BROWNSTONES

We are most proud of our dedication to the historical brownstones of New York. We restore brownstone homes to their former glory.

“ Progeny Restoration did the front restoration of my brownstone after the facade fell off. It was done well. My two neighbors saw the work and then got their brownstones completely restored and painted by Progeny. So now, three out of four buildings in a row have been restored by Progeny Restoration.”
 -K. BURRELL, BROWNSTONE OWNER

OUR INTERIORS

Progeny Restoration can do interior projects of small and large scale. From expanding your space to setting up the necessary wiring and plumbing, Progeny Restoration will guarantee home necessities. Our flooring, paint, and renovation work will beautify your space.

OUR EXTERIORS

We'll make you feel more secure through waterproofing and repointing work on the external structure of your building. Brick, stone, lintel, and stucco work can give a face-lift to your facade. Progeny Restoration also specializes in roofing repair and window replacement.
